PRODUCT INFORMATION

The Rain Bird MPR Spray heads are used with the 1800 & Uni-Spray series pop up in cases where sprinklers with various arcs and radius are to be used in the same zone and it is important to maintain even flows independent of the nozzle used.
Matched Precipitation Rates (MPR) means that you will get the same flow rate when nozzles are full circle, half circle or 1/4 circle hence improving the water distribution in your garden.
The top is coloured for easy radius and arc identification with the colour codes being: 5-MPR (red), 8-MPR (green), 10-MPR (blue), 12-MPR (brown) and 15-MPR (black).
