

Hayward Automatic suction pool cleaner type Magic Clean (0181771)

 **HAYWARD®**

TECHNICAL SPECIFICATIONS

Type

Magic Clean

PRODUCT INFORMATION

These cleaners, with their fun design, have been specially created for above ground pools and pools with flat bottoms. SmartDrive® programming for quick and efficient cleaning: they cover every square inch of your pool and suck up everything, from microscopic dust to large debris. Improved water circulation: they act like a mobile main drain moving the water as they move in the pool. The pool remains cleaner for longer and the water purer without overuse of chemicals. Easy installation in only 10 minutes: no need for tools. Silent operation. Saves energy: no need for a booster pump because they use an existing filtration system with a minimum 0,75HP pump.
