

Norsup Control unit type NorsupOne v2 (7037851)

NORSUP

TECHNICAL SPECIFICATIONS

Type

NorsupOne v2

PRODUCT INFORMATION

NorsupOne is an intelligent controller for pools and spas, with sensor and actuator software. It provides complete automation and management of your pool equipment, including push alerts in case of anomalies. NorsupOne provides worry-free management of treatments, water balance, filtration, heating and lighting.

Features:

- Complete automation and pool management
- WiFi and mobile network connection
- Remotely monitor and control all the device features
- Error and alarm notifications and history log for each diagnose and troubleshooting
