

Automatic backwash valve 50 mm glue spigot type Starway (7038735)

TECHNICAL SPECIFICATIONS

Type	Starway
Connection	glue spigot
Max. temp.	40 °C
Size	50 mm

PRODUCT INFORMATION

The Starway motorised valve is the ideal solution to automate your pool filter backwashing. There are several ways to control it: through a simple timer or through intelligent devices, by setting up a 24 VDC 2A power supply. The valve is equipped with an electric actuator with a closing function which, in the event of power loss, brings it back to the filtration position. It does not require additional installation of a compressor and related components and piping.

Features:

- 5-way valve
- No compressor required.
- Protection against accidental discharge in the event of a black-out
- 50mm and 63mm connection
- Possibility of remotely control with NorsupOne
