| Number of Exhausts | 2                              |

## PRODUCT INFORMATION

The Rain Bird Swing Joint, type EAGLE is ideal in professional and commercial installations where the Eagle series or other impact sprinklers are used.

The swing joint's special elbow design reduces the pressure loss by up to 50% thanks to the improved water stream channels in the joint.

The oversized threaded inlets and double o-rings make installation easier at under water or in difficult places.
